

Starting 2020, 100% of our iconic straps are now made using recycled plastic, reducing our impact so future generations are free to explore the wild world around them.

9 million

plastic bottles
will be kept out
of landfills.

172 tons

of plastic will be
turned into Teva straps.
That's 344,000 pounds!

5,000 miles

of recycled straps will be made in 2020.
(That's hiking the Pacific Crest Trail from
Mexico up to Canada—then back down again!)

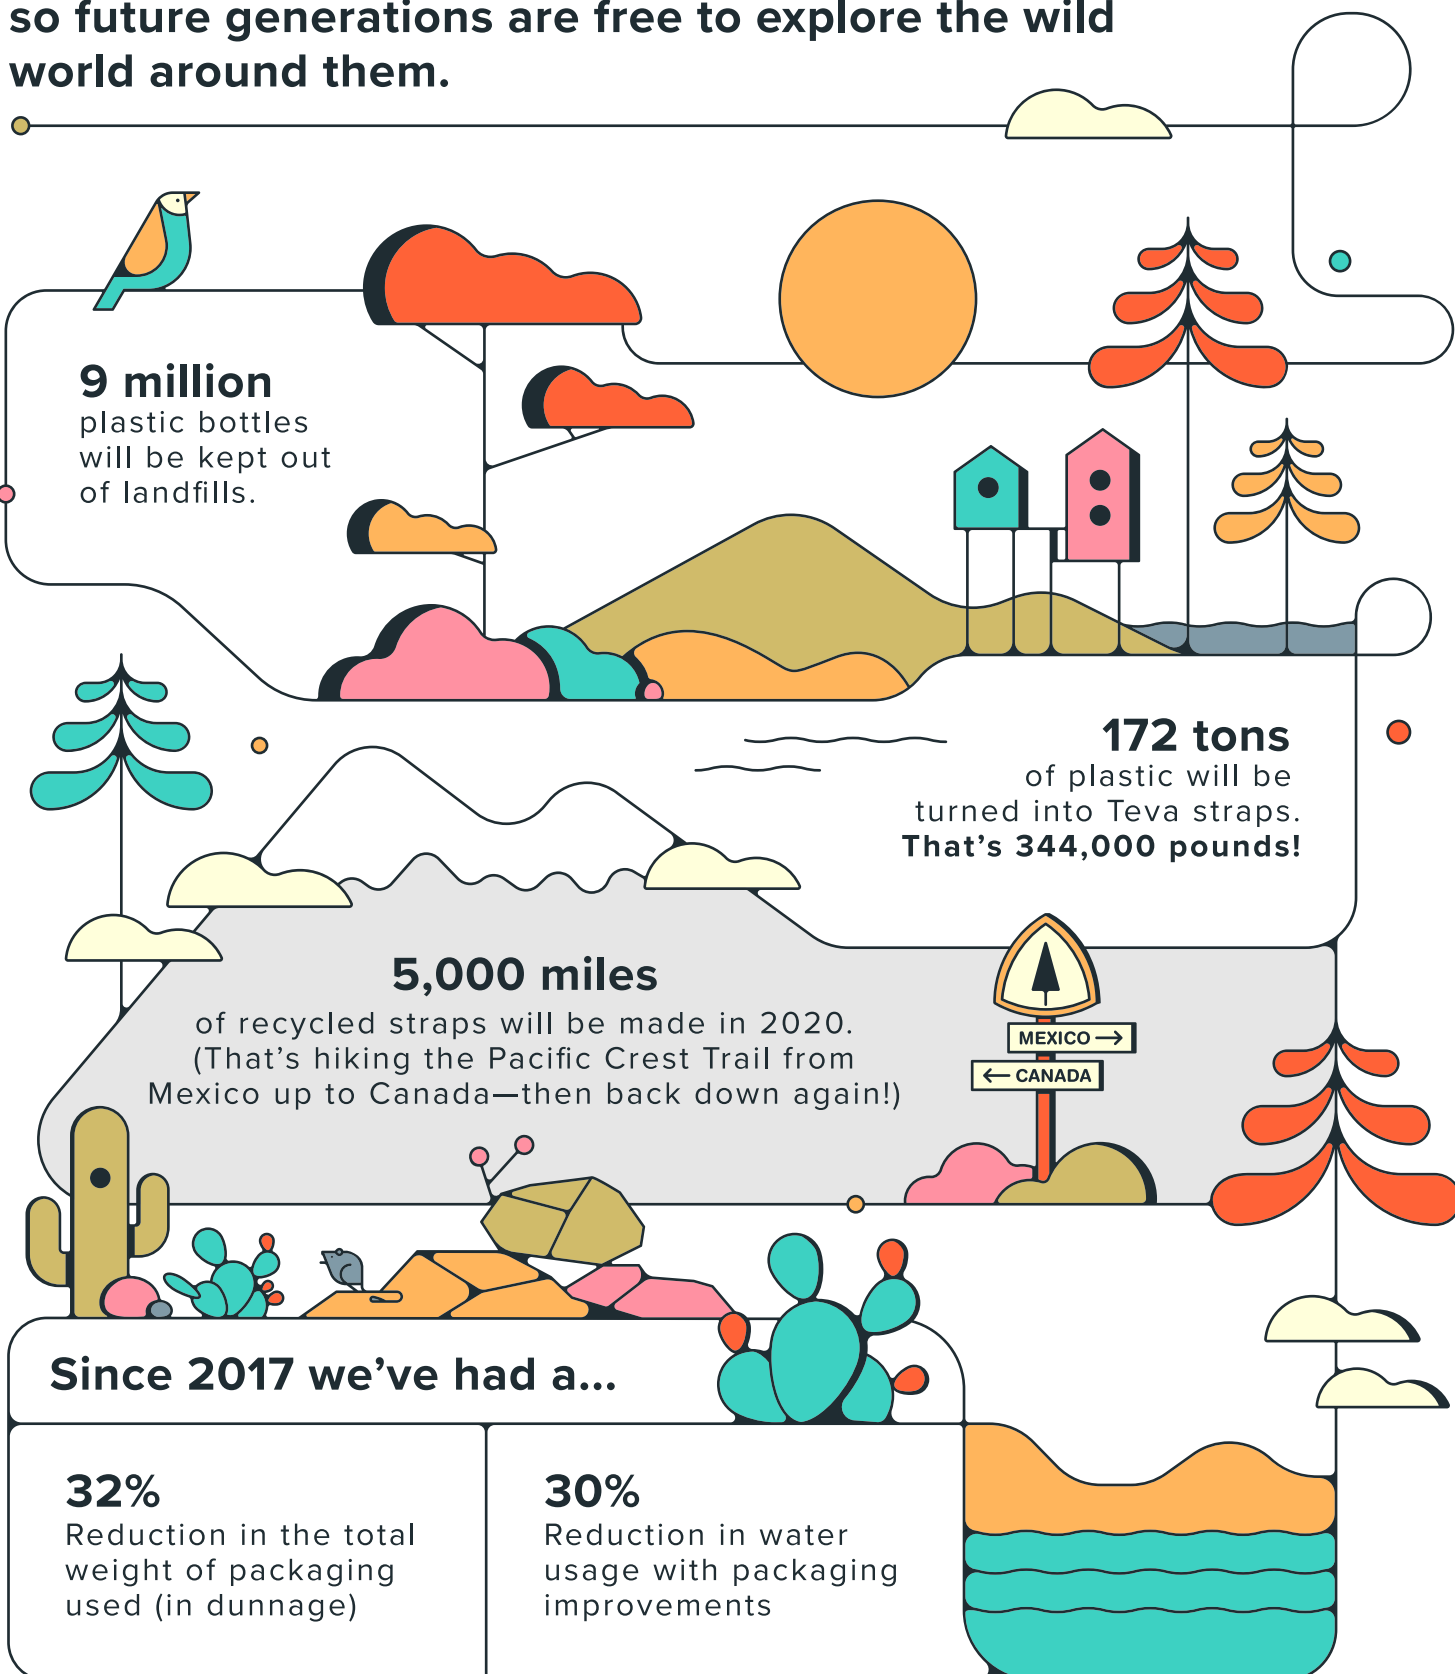

Since 2017 we've had a...

32%

Reduction in the total
weight of packaging
used (in dunnage)

30%

Reduction in water
usage with packaging
improvements

We're turning waste that pollutes the planet into something that helps you explore it.
